Summary

Experienced IT Project Manager with a focus on managing hybrid cloud environments and virtualization. Long-standing practice in the provisioning, administration, and migration of Wintel Server systems, including storage allocation (SAN/NAS) and remote management of data center resources.

Technische Schwerpunkte

- Azure & Cloud — 35%
- Windows Server — 30%
- Projektmanagement — 25%
- Virtualisierung — 10%

➢ Windows Server & Virtualization:
  Administration: Windows Server 2016–2025, File Services, DNS/DHCP
  Virtualization: Hyper-V, VMware ESXi/vSphere
  Security: Patching, Hardening, SAN/NAS Storage

➢ Cloud & Hybrid-Infrastructures:
  Microsoft Azure (IaaS): VM-Migrations, AD Connect, ExpressRoute
  Identity Management: Azure AD Sync, Entra ID
  Cloud Governance: Azure Arc, Backup-Solutions with MS Backup and Veeam

➢ Automation & Tools:
  Scripting: PowerShell, Azure CLI
  ITSM: SMAX-Ticketing, ITIL-Processes

Professional Experience:

<u>From 2021: Assignment via temp agencies/employee leasing</u>
Short-term project-related employments in various companies and industries with continuous expansion of professional competencies as well as high flexibility through diverse task areas

02.2025 - 03.2025, Senior System Administrator, IQ-Optimize Software GmbH
➢ Onboarding into IT systems and applications, including training and documentation work
➢ Technical assignments in the Essen data center (server migration, cabling, camera installation)
➢ Setup and configuration of a failover Hyper-V cluster as well as support for IT services and database tasks
➢ Assumption of the project management role for adapting the monitoring software Checkmk (formerly Nagios)
➢ Coordination of documentation and collaboration with teams
➢ Use of new platforms Wiki/Miro for documentation and team collaboration

01.2023 - 02.2024, Windows & Cloud Support Admin, Evonik GmbH (ANÜ über SEL-Hermes)
➢ Separation of Active Directory users, computers, and files into trusted domains to enable the spin-off of sold departments from the Evonik domain
➢ First steps in PowerShell automation to optimize IT processes
➢ Proof of Concept (PoC) Infrastructure as a Service (IaaS) Windows VM Migration to Azure
➢ Management of Active Directory synchronization between on-premises and Azure environments with AD Connect, MS Entra ID, and ExpressRoute
➢ Responsible for provisioning, maintenance, security optimization, and troubleshooting of Windows Server systems
➢ Work with Backup & "Disaster Recovery" solutions, including Azure Backup and Veeam
➢ Support for Windows Failover Clustering and Storage Management (SAN, NAS)
➢ Management and automation of Windows Server systems in hybrid environments ITSM and SMAX tickets for server provisioning and decommissioning

03.2021   – 04.2022, Business and IT-Consultant, Develogment GmbH
➢ Responsible for the provisioning and maintenance of Windows Server systems
➢ Automation of document processes with Abbyy FlexiCapture
➢ Configuration and administration of EDI solutions (Lobster scripts)

<u>Between 2007 and 2021: Permanent employment at DXC-Technology (formerly HP-Enterprise)</u>
Constructive professional advancement and development through diverse positions, departments, and locations within the company

06.2015 – 02.2021, Technical Project Manager IT & Cloud Migrations, DXC-Technology
➢ Leadership of data centers and cloud server setup and migration projects for large customers (ThyssenKrupp, Roche, Mewa)
➢ Close collaboration and support for solution architects and contract managers

- ➢ Ensuring compliance with best practices (ITIL) for hybrid and cloud environments

06.2011 – 05.2015, Development Team Leader and Product Owner, DXC-Technology
- ➢ Responsible for conception and management of the in-house application "Asset and Reporting Management"
- ➢ Main point of contact (Single Point of Contact) for internal and external stakeholders
- ➢ Mapping of complex billing models for non-flat-rate calculable services (telephony, hardware devices, IP-based services)
- ➢ Ensuring adaptation to customer and user requirements
- ➢ Responsible for resource, budget, and schedule planning
- ➢ Technical co-responsibility for:
  - Java software modules with Oracle and MySQL databases
  - HTTP-based reporting tools, COBOL components
  - Python scripts for analyzing IP addresses in customer networks

09.2007 – 05.2011, Windows Server Support Specialist, DXC-Technology
- ➢ 3rd Level Windows Server Support for customers worldwide
- ➢ Participation in global HP data center transformations and migrations
- ➢ Support for server setup, maintenance, and troubleshooting

01.2002 - 08.2007 IT Company Founder & Managing Director, Michael Bros. Ltd.
- ➢ IT service provider for international customer projects, particularly in Germany.
  Responsible for acquisition, implementation, and operation of IT infrastructure projects:
  - Setup, implementation, and administration of Windows Server, as well as hybrid environments
  - Planning and realization of network solutions: LAN, WAN, VPN, Wireless
  - Setup and maintenance of communication systems (telephone systems, e-mail servers)
  - Customer consulting and comprehensive support for Microsoft products

---

Education & Certification:
Academic Degrees:
- ➢ Dipl.-Ing. Computer Engineering – Technical University Ruse
- ➢ Advanced Studies in International Trade – Economic University Sofia

Cloud & Infrastructure:
- ➢ Cloud Specialist - Azure Administrator (Preparation for AZ-104)
- ➢ Windows Server 2022 Administration

Project Management:
- ➢ PMP - Project Management Institute
- ➢ PRINCE2 - Practitioner & Foundation

IT-Service & Processes:
- ➢ ITIL V.3 Foundation

Language Skills:

Language	Level	Details
Deutsch	Negotiation-secure	Written and oral
